

THE DAYTON POWER AND LIGHT COMPANY
SIMPLIFIED APPLICATION FOR INTERCONNECTION
UNDER THE SIMPLIFIED LEVEL 1, LEVEL 1.1, OR LEVEL 1.2
REVIEW PATHS

SHORT APPLICATION FORM
FOR INTERCONNECTION OF CERTIFIED INVERTER BASED GENERATION EQUIPMENT
FIFTY KILOWATTS OR SMALLER TO THE ELECTRIC DISTRIBUTION SYSTEM

Electric Distribution Company: The Dayton Power and Light Company

Electric Distribution Company's Designated Contact Person:

DP&L Business Call Center
Attn: Rob Beeler
1900 Dryden Road
Dayton, OH 45439
Phone: (800) 253-5801
Email: interconnection@dplinc.com

Please complete all sections of the application and include all attachments. Depending upon the information you provide, more information may be required. If so, DP&L will contact you at that time.

Processing Fee:

The application fee is based on actual costs per one-tenth of an hour on time spent on the simplified review. The following fee has been filed with the Public Utilities Commission of Ohio:

Rate: \$6.63 per 1/10th hour

SECTION 1 - Applicant Information

1.1 Legal Name of the Applicant:

Name: _____
Address: _____
Phone: (____) _____

E-mail address: _____

1.2 Applicant's Electric Service Customer Account Number: _____

1.3 Name and Address of the Applicant as it appears on the Applicant's electric bill from the Electric Company:

Name: _____
Address: _____
Phone: (____) _____

1.4 Proposed Generation Ownership (Please check one):

- Customer owned
- Third Party owned

Explanation of ownership arrangement: _____

1.5 Check if you are applying to be a net metering customer
- If so, please attach the completed Net Metering Service Information Request form

SECTION 2 – Consulting Engineer/Contractor Information

2.1 Consulting Engineer or Contractor if applicable:

Name: _____
Address: _____
Phone: (_____) _____
E-mail address: _____

SECTION 3 – Generation Equipment and Customer Location Information

3.1 Estimated In-Service Date: _____

3.2 Existing Electric Service at the Customer’s Location:

Capacity: _____ Amperes Voltage: _____ Volts

Service Character: Single Phase Three Phase

DP&L Rate #: _____

3.3 Location of Protective Interface Equipment on Property (e.g. “southwest corner of lot”):

3.4 Indicate all possible operating modes for this generation equipment:

This generation equipment is intended to be used to:

1. _____
2. _____
3. _____

(Attach additional pages as necessary, labeled “Additional Operating Modes”)

3.5 Energy Producing Equipment Information:

Manufacturer: _____
Model No. _____
Version No. _____
Fuel Source Type (Solar, Wind, etc.): _____
Total kW of Proposed Facility: _____
kVA Rating: _____ Voltage Rating: _____

3.6 Inverter Information:

Manufacturer: _____
Model No. _____
Version No. _____
kW Rating of each Inverter: _____
Number of Inverters (if more than one): _____
kVA Rating: _____ Voltage Rating: _____

3.7 Total Generator Nameplate Rating kW (include all inverters if inverter based system): _____
Expected kWh output of generation: _____

SECTION 4 - Attachments

4.1 Please provide the following attachments:

- Testing results documenting conformance with the Company's technical requirements
- Documentation confirming that a nationally recognized testing and certification lab has listed the equipment
- One Line Diagram (specific to Customer's installation)
- Installation Test Plan
- Equipment Manufacturer's Recommended Maintenance Schedule
- Site diagram showing disconnect switch location

The Dayton Power and Light Company (“Company”)

Net Metering Service Information Request

Customer’s Name: _____

Account Number: _____ Rate Number: _____

Service Address: _____

City: _____ State: OH Zip Code: _____

Contact Person (if different than Customer): _____

Telephone Number: _____

Address: _____

City: _____ State: _____ Zip Code: _____

Email Address: _____

Generation equipment ownership (check one):

Will the Customer: Own: _____ Rent: _____ Lease: _____ Other: _____

If other please describe: _____

A. Total generating capacity: _____ kW

B. Expected Annual Output: _____ kWh

C. Expected Capacity Factor = $B / (A * 8760)$

Expected Capacity Factor: _____ %

Capacity Factor is the ratio of what the facility should produce compared to what it would produce if 100% efficient, 100% of the time.

Customer qualifies for net metering if the generating facility uses as its fuel either solar, wind, biomass, landfill gas or hydropower or uses a micro-turbine or fuel cell which is located on the Customer’s premises (located at the same address as Customer’s account). The Customer’s generating equipment must operate in parallel with the Company’s transmission and distribution systems. The Customer’s generation equipment must be intended to offset part or all of the Customer’s requirements for electricity. Generating equipment which is significantly oversized, as compared to the Customer’s maximum demand, may not qualify for net metering and may incur additional interconnection costs. The Customer

or its Developer must complete an interconnection application and receive approval to interconnect in order to qualify for net metering service. The Customer's equipment must be inspected before net metering service may begin. If Customer is served by a competitive retail electric service (CRES) provider, Customer should make arrangements with its CRES provider to receive net metering credits in accordance with OAC 4901:1-21-13.

The Customer acknowledges that it has read the Company's Net Metering rules found in Tariff Sheet No. D5 and agrees to all terms and conditions contained therein, including without limitation those specified in the Company's Distribution Interconnection Tariff, Tariff Sheet No. D35. Specifically, the Customer understands and agrees that a meter, which is capable of registering the flow of electricity in each direction, must be in service at the facility. If a meter is not in service with this capability, the Customer must submit a written request for the Company at the Customer's cost to acquire, install, maintain, and read an approved meter. All costs related to this meter shall be borne by the Customer. Customer acknowledges and agrees that operation of Customer's generation facility is intended primarily to offset part or all of Customer's electricity requirements in accordance with the Company's Net Metering rules.

Meter Exchange Fee:

The purpose of this fee is the installation and/or reprogramming of a bidirectional meter that is capable of measuring the flow of electricity in two directions.

Charge: \$95.00
