# BE A SAVINGS CHAMPION WITH CHP REBATES

Take **advantage** of the  
**benefits** of cogeneration.

## CHP

Combined Heat & Power (CHP), also known as cogeneration, is the simultaneous production of electricity and heat from a single fuel source. CHP is more efficient than separate generation of electricity and thermal energy. Higher efficiency translates to lower operating costs and reduces emissions including CO<sub>2</sub>, NO<sub>x</sub>, and SO<sub>2</sub>. CHP can increase power reliability and enhance power quality. On-site electric generation can help reduce grid congestion.

## Gain a Competitive Edge

Controlling energy costs is becoming increasingly important. Not only does it positively affect your bottom line, it's also an important component of any company's green initiative. Thanks to new technologies, there are ample opportunities to decrease energy use, increase efficiency and save money.

## CHP Rebates

CHP rebates can help reduce the payback period for investments in CHP technologies. Qualified projects sized at 500 kW or less will receive a rebate based on rated design capacity and kilowatt hours generated during the first year the project is commissioned. Generation will be paid in two installments, at 6 and 12 months. Capacity will be paid at project completion.

### REBATE CALCULATION

\$0.08 per kWh generated  
\$100 per kW capacity

### Apply Online

Pre-approval is required for all CHP Rebates.  
The application can be found at [dpandl.com/CHP](http://dpandl.com/CHP).

## Reimbursement for CHP Projects

EFFICIENCY LOWER HEAT VALUE (LHV)	REIMBURSEMENT PERCENT
80% or higher	100% of the calculated payment
70-80%	90% of the calculated payment
60-70%	80% of the calculated payment

- Rebates will be based on the final cost of the project, and will be limited to 50% of the total project cost.
- An individual account number will be limited to \$500,000 in CHP rebates in any calendar year. For CHP systems over 500 kW, please contact DP&L to discuss potential incentive levels.

## Eligibility Opportunities

All DP&L business and government customers have the opportunity to receive DP&L's CHP Rebates. **CHP projects that are not pre-approved will be ineligible for a rebate.**

- Eligible equipment must:**
  - Be installed in the DP&L service territory
  - Meet or exceed a minimum system efficiency of 60% LHV

## Feasibility Study

DP&L will provide up to \$10,000 to subsidize the cost of a CHP Feasibility Study and encourage the implementation of CHP projects.

- Submit Application and a Facility Data Form for the facility that will be studied. DP&L will then provide a decision regarding approval of the program application.
- Submit the request for proposal (RFP) that will be issued for the study to DP&L for approval.
- Issue the RFP and select the CHP study vendor.
- Submit the Firm Selection Form and the winning proposal to DP&L for approval.
- Upon DP&L approval of the selected firm and its study proposal, proceed with the study.
- Max study cost will be net of any outside funding received and in no case will the DP&L reimbursement exceed the customer's final out-of-pocket costs.

*The application and forms can be found at [dpandl.com/CHP](http://dpandl.com/CHP).*

## More Information

For more information, rebate amounts, and a complete list of terms and conditions visit [dpandl.com/save](http://dpandl.com/save) or contact us at [EnergyEfficiency@dplinc.com](mailto:EnergyEfficiency@dplinc.com). Rebate values are subject to change and apply only to new, unused equipment. Rebate measures and values for the 2019 programs are for equipment and services purchased and installed on or after January 1, 2019.

Rebates are issued directly to the customer. Each project will only be eligible to receive a single DP&L rebate. Funds are allotted on a calendar-year basis and are available on a first-come, first-served basis.

DP&L shall make the final determination regarding rebate amounts.

DP&L reserves the right to deny any rebate. All DP&L energy programs are subject to Public Utilities Commission of Ohio rules and regulations.
