# ***ARE YOUR HEATING AND COOLING SYSTEMS MISMATCHED?***

Did you know? Heating and cooling systems manufactured today are much more efficient than systems built just 10 to 15 years ago.

Mixing old and new technology can actually decrease system performance. Matched HVAC systems complement each other allowing both systems to operate properly, increasing home comfort and energy savings.

If you're in the market for a new furnace, replacing both your heating and air conditioning systems - even if one is still working - can save energy and money over the long term. And, DP&L is here with rebates to get you cash back in the short term.

**LEARN MORE AT [DPANDL.COM/HVAC](http://DPANDL.COM/HVAC)**

**DP&L.**

DP&L can offset the cost of a new HVAC system by \$100 - \$1,000 when using a participating contractor. If you pair the installation of your new system with an Energy Star Smart Thermostat, you can get an additional \$50 rebate.
