

INFRASTRUCTURE GRANTS

A COMMITMENT TO

WEST CENTRAL OHIO

Dayton Power and Light has been proudly serving West Central Ohio since 1911. We've grown over the years just as the region has grown. As the local electric company, we share a common goal with the communities we serve - the promotion of a strong economy with quality jobs. Working together, we all create a shared success.

THE INFRASTRUCTURE GRANT PROGRAM - AN OVERVIEW

When an existing business plans to expand or a new business considers locating to the area, the DP&L electrical facilities, and other infrastructure, often must be upgraded to meet the growing needs of the business. This can require a sizable capital commitment on the part of either the business or the community. DP&L's Infrastructure Grants are available to help offset the capital cost, promoting job growth and the regional economy.

GUIDELINES

Infrastructure Grants may be used to offset the cost of expanding and upgrading DP&L electrical facilities to serve a new or expanding business, including the cost of line extensions, transformers, and meter relocations. DP&L will also consider providing grants to offset other infrastructure costs on a case-by-case basis, such as water, sewer and land price. *To receive a grant, the site of the new or expanding business must be served by DP&L and in general, should:*

- ✓ Expect to have an electric load equal to or greater than 400kw.
- ✓ Hire at least 10 new full-time employees as a result of the expansion or new project within the first two years of operation.

- ✓ Consider the Infrastructure Grant as critical to the decision of expanding or locating its business in the region.

In evaluating projects, DP&L will evaluate the proposed facility's economic impact on the region and DP&L, including:

- ✓ Does the business or project have a positive long-term impact that makes the economy stronger?
- ✓ What is the short-term and long-term economic impact to DP&L?

HOW TO APPLY

To apply for an Infrastructure Grant, contact DP&L at economicdevelopment@dplinc.com and we will email you an application. In addition, DP&L works with a number of communities and economic development organizations on an ongoing basis. Many of these organizations have information regarding Infrastructure Grants as well.

OTHER DP&L PROGRAMS

DP&L offers additional programs and opportunities for customers and communities. DP&L also offers customers and local governments energy efficiency programs that can help save both money and energy. More information is available at www.dpandl.com/development
