

The national average annual electricity cost to run a refrigerator is **\$625**

A **20-year-old** refrigerator can use **200-300%** more energy than new high efficiency models

Recycling your second refrigerator will save **\$150** per year in energy costs

A full refrigerator **RETAINS COLD BETTER** than an empty one

Recycling an old refrigerator saves enough **CARBON DIOXIDE** emissions equal to taking one car off the road for one year

Set your Refrigerator at: **35-38°** and Freezer at: **0°**
